**Dr. J. Rajasankar**  
Chief Scientist  
CSIR-SERC

### LETTER OF APPRECIATION

CSIR-Structural Engineering Research Centre, Chennai has purchased ABAQUS software. The software was supplied and is under technical support and maintenance with M/s EDS Technologies. The firm is providing continuous support for effective use of the software for our applications on structural engineering domain.

We had a training session at CSIR-SERC on March 20, 2024 for specific queries about using the software for some of our advanced applications. The session was conducted by Dr. Danish Handa, Solution Consultant with M/s. EDS Technologies, Chennai.

Dr. Handa conducted the session in excellent manner to present the solution to the queries posed by the attendees. He is found to have thorough knowledge about the subject and also the features and tools available with the software. We appreciate the valuable insights shared by him on problem modelling besides solution extraction and interpretation. The training helped all the participants to gain a better understanding of using the software for similar applications. The session was both informative and engaging, and the positive feedback from participants reflects the quality of his presentation and the relevance of the content. We thank him for his expert guidance and also sharing a short document prepared as a guide for each of the query addressed during the session. This will remain in our archive for reference.

We would also like to thank M/s. EDS Technologies for their ongoing support in providing us with such valuable learning opportunities.
