

## Capabilities

- Trusted and industry-leading technology focused on Digital Engineering, Simulation, Design Optimization, and Product Lifecycle Management across Air, Land, Sea, and Space, as well as Manufacturing and Industrial Equipment.
- Software, services, consulting, research, and development accelerating outcomes for Defence Primes and the entire supply chain.
- Virtual Twin experiences driven through the 3DEXPERIENCE platform and applications, enabling greater collaboration, visibility, and adaptability to large-scale, complex manufacturing challenges.
- Full program lifecycle support, including solutions for predictive maintenance, logistics, and sustainment activities – enabling improved outcomes from concept design to decommissioning.

## Accreditations

## About Us

Dassault Systèmes provides businesses and people with collaborative 3D virtual environments to imagine sustainable innovations. Whether it's developing smarter manufacturing processes, accelerating product development, or improving master planning with 'What-If' scenario analysis, Dassault Systèmes drives innovation all around you. 3DS has leading capability in 3D Design, Engineering, Modelling, Simulation, Data Management and Product Management.

## Successes

**Enhanced Collaboration and Efficiency:** Streamlining teamwork and partnerships, improving communication, and reducing bottlenecks, resulting in accelerated project execution and up to 50% faster program launches.

**Proactive Risk Mitigation and Cost Control:** Early detection and mitigation of design flaws, ensuring projects remain on budget and on schedule, potentially reducing project lead time by up to 30%.

**Optimized Lifecycle Management:** Comprehensive product lifecycle management, from initial design to maintenance and upgrades, ensuring systems are designed correctly the first time and remain operationally efficient.

**Resource Efficiency and Sustainability:** Minimizing the need for physical prototypes and costly testing facilities, resulting in cost savings and contributing to more sustainable defence projects.
