

**JOB DESCRIPTION FORM**

<b>Position:</b>	<b>Solution Architect</b>	<b>Client:</b>	<b>NA</b>
<b>Department:</b>	<b>3DExperience Consulting Services</b>	<b>Location:</b>	

**What will your role be?**

- As Solution Architect you would be working closely with Dassault Systèmes' business consultants to capture customer business processes and promote 3DS Industry Solution Experiences (ISEs).
- Work within our structured Value Engagement framework to define the architecture vision and solution architecture leveraging 3DS knowledge to support customer business objectives, highlighting committed value, and taking extra care of feasibility and delivery effort.
- Leverage collaboration within the 3DS organization around a common view of the solution architecture for project success and customer satisfaction.
- Work in both services and sales contexts to ensure technical continuity between the solution and value propositions scoped in the sales cycle, and the solution delivered through product implementation.
- Support and guide our community of Solution Architects and Software Architects, both within DS and from SI partners, in relation to solution definition and development.

**The Challenges Ahead:**

- Should have designed / architected solution for customer business problems independently in at-least 2 customer engagements
- Should have knowledge of business process of 2-3 industries (automotive, aerospace, high-tech, energy, etc.)
- Should have process knowledge in 3-4 domains (Change Management, Engineering Release, Manufacturing Processes, Program / Project Management, Variant Management, etc.)
- Should have involved in 3DEXPERIENCE Solution Architecture

**Your Key Success Factor / Skills Required:**

- Should have Platform customization experience/expertise
- Should have 3DEXPERIENCE Data Specialization knowledge
- 3DEXPERIENCE Upgrade, migration or environment setup knowledge, can be an added advantage
- Expertise in Integration with other tools, can be an added Advantage
- Should be open for travel within India
- 5 years' experience in a Software Expert / Software Architect role
- 8-10 years' experience on 3DEXPERIENCE implementation/deployment
